

# INTEGRA™

## FLIGHT TRAINING DEVICE

# INTEGRA™ FTD

The TRU Simulation + Training INTEGRA™ device gives pilots real training flexibility to focus on their training. With superior reliability and device adaptability the INTEGRA fixed training device is the perfect addition for your training operations.

## Key features of the INTEGRA:

- Focused on realistic flight simulation for:
  - Avionics Proficiency
  - Normal Procedure Training
  - Emergency Procedure Training
  - Crew Coordination Exercises
- Same flight model, aerodynamic fidelity and high performance control loading (TRU's proprietary RealFeel® loaders) as our Level D Full Flight Simulators (FFS)
- Allows pilots to train with the same avionics system and realism in the actual cockpit, to get used to the avionics and scan patterns of the aircraft
- Fits inside a standard size classroom to be easily added to any training center
- Multiple visual display options available based on classroom size and budget
- Capable of FAA Level 5 FTD qualification

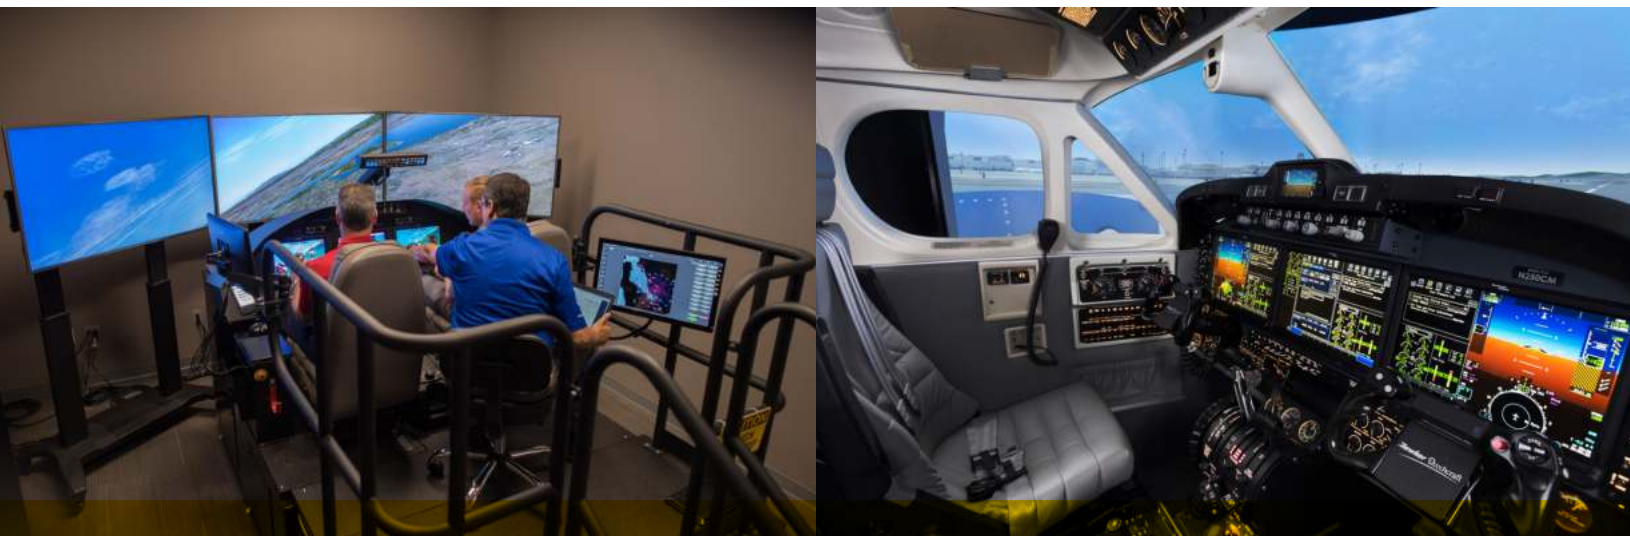

### M2/CJ3+ INTEGRA

“The integra was fantastic, made learning the avionics and flow patterns great before spending time in the sim. Availability of integra was great.”

### Latitude INTEGRA

“The Integra training device was a critical element to my success and I would recommend providing this for all available training. It reduced my learning time significantly.”

Visual Display system shown for example only. Multiple visual systems available as options.
